Skills

- **SQL** – Snowflake
- **Python** – Pandas
- **Jupyter Notebooks**
- **Looker** – Modeling & Visualisation
- **dbt** – Core & Cloud
- **Git & Github**
- **R Studio**

Education Background

- **Birkbeck, University of London**
Graduate Certificate in Statistical Data Science
Completed in 2021
- **Birkbeck, University of London**
Affiliate Student studying Calculus 1 & Statistics 1
Completed in 2020
- **University College London**
MSc International Public Policy
Completed in 2013
- **University of Reading**
BA Politics & International Relations
Completed in 2011

About Me

I am an Analytics Engineer who is passionate about developing data led solutions that give people the confidence to make decisions which improve outcomes for customers and business. I have experience working in cross-functional teams and particularly in translating complex technical concepts to non-technical stakeholders. I am particularly interested in working with modern data stack tooling and am always looking to find new & interesting tech to work with.

Professional Experience

The Orchard | Analytics Engineer

March 2023 – Present

Key responsibilities:

- Introduced Pull Requests & Review templates into both Looker & dbt Cloud Workflows
- Built datasets to support a new business review process, leading to greatly reduced time-to-analysis for our analysts
- Managed the interface between the Data Engineering teams & the Analytics team to prioritise new ingestion tasks
- Implemented slim CI checks for all dbt pull requests, ensuring no broken code was further introduced to production
- Introduced datadog alerting for periods of heavy load on our Snowflake warehouses
- Co-led a project to introduce functional Snowflake warehouses for different user groups in Looker, leading to a reduction in queuing times at neutral or reduced costs
- Worked on a POC with a 3rd party API MusicBrainz, and built a set of models to extract data downloaded to s3 for use by our data science team

TotallyMoney | Senior Data Analyst

September 2021 – September 2022

Key responsibilities:

- Implemented dbt to help modernise and streamline our data
- Mentored junior team members on the theory and practice of A/B testing, empowering them to use statistical methods in their own work
- Supported other non-technical teams to upskill their A/B testing processes enhancing trust in observed metrics, and improving decision making

TotallyMoney | Product Data Analyst

October 2018 – September 2021

Key responsibilities:

- Implemented A/B testing within our Product team & embedded it as part of our day-to-day practice
- Developed key relationships with the Engineering team to define what data we required, and in what form we should collect it
- Gathered stakeholder requirements for reporting, and developed Looker models & accompanying visualisations for them
- Co-administrated our Looker instance, ensuring that we met uptime and data quality targets
- Worked within cross-functional squads to understand customer needs, and leverages data insight to improve our revenue and customer satisfaction goals
- Moved product team away from all spreadsheet based legacy reporting
- Developed Monthly Active User reporting and helped identify it as our North Star metric
- Undertook ad-hoc pieces of reporting and insight work from across our various product teams & the wider business

Start Up Loans | Risk & Data Analyst

September 2017 – September 2018

Key responsibilities:

- Used SQL to produce MI on a daily basis for internal and external stakeholders at various levels of technical ability
- Involved in company wide data automation & rationalisation project focusing on delivering automated reporting using a mix of SQL & VBA
- Jointly responsible for the creation of monthly reporting packs for the company board including data extraction, manipulation and process improvement
- Identifying issues with data warehouse feed and liaising with suppliers to rectify issues
- Analysing impact of, and the implementation of changes to our automated lending scorecard

Start Up Loans | Performance Analyst

August 2014 – September 2018

Key responsibilities:

- Producing monthly reports on a network of 30+ subcontractors comparing performance data against key KPIs, and forecasting information on loan volumes
- Working across internal teams to identify over 20 subcontractors who were not meeting minimum KPI and quality levels, leading to their exit from the scheme.
- Led on specifications for, and implementation of an excel based, five-page bespoke quarterly report for each subcontractor on their KPI performance
- Produced benchmarking data and draft KPIs during the companies last contract renewal process
- Introduced a performance scorecard to monitor and automatically RAG rate the companies network of subcontractors
